

The OMEGA platform lift gives wheelchair users or disabled people the possibility to overcome staircases or steep ramps without and attendant assistance.

Indoors or outdoors - the lift gently integrates into every surrounding area. Whether for private or public uses, straight or curved staircases, the OMEGA is a synonym for mobility, quality and pleasure of life.

Because of the extreme space saving and compact construction, the installation is possible at almost all staircases. When the platform is folded the OMEGA is the narrowest stairlift on the market!

Our experience is your advantage !

- ▶ Suitable for all kinds of staircases
- ▶ Extremely space saving because of its slim construction
- ▶ Confirming to the highest safety and quality standards - CE certified
- ▶ Intermediate landings are possible
- ▶ Universal exertion - executed with platform and/or folding seat
- ▶ Individual platform sizes and colours are possible

Even for longer courses across the garden the OMEGA is a very reliably lift.

OMEGA seat version

Especially outdoors the OMEGA meets a solid, however shapely lift system.

Neither bad weather conditions nor a steep, respectively uneven terrain can brave the OMEGA. This resistance is granted by a hot galvanized execution of the complete plant. Electric components are moisture-proof.

Suited to the local conditions the OMEGA is applicable nearly everywhere.

Elegant designed as well as resistant against worthy weather conditions, the optional possible stainless steel execution is captivating.

Simply along staircases or across the silhouette of a garden area, the OMEGA brings you safety and comfortable to your destination.

Reliability for outdoor areas !

- ▶ Rail in hot galvanized execution
- ▶ Optional possible in stainless steel
- ▶ Electric components are moisture-proof
- ▶ Suitable for transport of goods
- ▶ Long distances are feasible
